

IN THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims

1. (Currently Amended) A horizontal spit rotisserie oven comprising:

a cabinet having a plurality of side walls, each having an interior face and exterior face, and resting on a horizontal surface;

a spit assembly that can be positioned within the cabinet; and

a control box comprising an activation switch and a spit assembly drive mechanism, wherein the control box is attached to a cooking heating member, wherein the control box is ~~can be~~ mounted on the exterior of one of the side walls of the cabinet by a manually activated latch, and wherein the control box and the cooking heating member can be manually removed without the use of tools from mounting on from the cabinet, and wherein when the control box is mounted on the exterior of one of the side walls of the cabinet, the cooking heating member and the spit drive mechanism driving the spit are positioned within the cabinet.

2. (Currently Amended) The horizontal spit rotisserie oven of claim 1 wherein the cooking heating member can be manually removed from the cabinet without the use of tools, ~~when the control box is mounted on the exterior of one of the side walls of the cabinet, the cooking heating member and the spit drive mechanism driving the spit are positioned within the cabinet.~~

3. (Original) The horizontal spit rotisserie of claim 1 wherein the side walls of the cabinet each have only a single panel between their interior and exterior faces.

4. (Original) The horizontal spit rotisserie of claim 1 wherein the cabinet has an opening through which food is loaded into the cabinet, and the opening is covered by a door having an interior and exterior face wherein the door has only a single panel between its interior and exterior faces.

5. (Original) The horizontal spit rotisserie of claim 1 wherein the cabinet has an opening through which food is loaded into the oven cabinet, and the opening is covered by a door and the door can slide under the oven cabinet and the door can be lowered below the horizontal surface on which the rotisserie rests.

6. (Original) The horizontal spit rotisserie of claim 1 wherein the control box is removed from the cabinet by pulling the

control box generally orthogonally away from the side wall on which the control box is mounted.

7. (Currently Amended) ~~The horizontal spit rotisserie of claim 1~~
A horizontal spit rotisserie oven comprising:

a cabinet having a plurality of side walls, each having an interior face and exterior face, and resting on a horizontal surface;

a spit assembly that can be positioned within the cabinet; and

a control box comprising an activation switch and a spit assembly drive mechanism, wherein the control box is attached to a cooking heating member, wherein the control box is mounted on the exterior of one of the side walls of the cabinet by a manually activated latch, wherein the control box and the cooking heating member can be manually removed from the cabinet, and wherein the cooking heating member is at least one of an electric, resistive, or tubular heating element.

8. (Original) The horizontal spit rotisserie of claim 1 wherein the activation switch is a countdown timer which activates and terminates operation of the rotisserie.

9. (Original) The horizontal spit rotisserie of claim 1 wherein the activation switch is a timer which activates a food warming feature after cooking.
10. (Original) The horizontal spit rotisserie of claim 1 wherein the spit drive mechanism is a gear reduced electric motor.
11. (Original) The horizontal spit rotisserie of claim 1 wherein the control box has a light which illuminates an interior of the cabinet when the control box is mounted on the cabinet.
12. (Original) The horizontal spit rotisserie of claim 11 wherein a globe of the light protrudes into the cabinet.
13. (Original) The horizontal spit rotisserie of claim 1 wherein the cabinet comprises side rails which support it above a horizontal surface.
14. (Original) The horizontal spit rotisserie of claim 1 wherein the cabinet has a plurality of feet wherein the feet attach to the side walls using tabs extending away from the side walls.
15. (Currently Amended) ~~The horizontal spit rotisserie of claim 1~~
A horizontal spit rotisserie oven comprising:

a cabinet having a plurality of side walls, each having an interior face and exterior face, and resting on a horizontal surface;

a spit assembly that can be positioned within the cabinet; and

a control box comprising an activation switch and a spit assembly drive mechanism, wherein the control box is attached to a cooking heating member, wherein the control box is mounted on the exterior of one of the side walls of the cabinet by a manually activated latch, wherein the control box and the cooking heating member can be manually removed from the cabinet, and wherein the cooking heating member helps structurally support the control box to be mounted to the cabinet.

16. (Original) The horizontal spit rotisserie of claim 1 wherein the cabinet mounts a food warming tray.

17. (Original) The horizontal spit rotisserie of claim 1 wherein when the control box is mounted on the cabinet there is an air gap between an outside face of the cabinet and an inside face of the control box.

18. Canceled

19. (Currently Amended) ~~The horizontal spit rotisserie of claim 1~~
A horizontal spit rotisserie oven comprising:

a cabinet having a plurality of side walls, each having an interior face and exterior face, and resting on a horizontal surface;

a spit assembly that can be positioned within the cabinet; and

a control box comprising an activation switch and a spit assembly drive mechanism, wherein the control box is attached to a cooking heating member, wherein the control box is mounted on the exterior of one of the side walls of the cabinet by a manually activated latch, wherein the control box and the cooking heating member can be manually removed from the cabinet, and wherein the cabinet has an access door.

20. (Original) The horizontal spit rotisserie of claim 19 wherein an axis of the spit is closer to the door than to the cooking heating member.

21. (Original) The horizontal spit rotisserie of claim 1 wherein the cabinet has a transparent window.

22. (Original) The horizontal spit rotisserie of claim 1 wherein an axis of the spit is closer to the window than to the cooking heating member.

Customer No. 24574

23. (Original) The horizontal spit rotisserie of claim 1 wherein a frontal portion of the cabinet is inclined.

24. (Currently Amended) A food cooking rotisserie, comprising:
an enclosure with a plurality of peripheral walls;

a spit assembly capable of being positioned within the enclosure;

a control box removably coupled to the exterior of one of the peripheral walls of the enclosure by a manually activated latch;

a cooking heat source formed integrally with the control box; and

a spit drive mechanism formed integrally with the control box, wherein the control box, the cooking heat source and the spit drive mechanism are manually removable from the enclosure without use of tools

and wherein the cooking heat source and the spit drive mechanism are positioned within the cabinet.

25. (Original) The food cooking rotisserie of claim 24 wherein the enclosure has a transparent window.

26. (Original) The food cooking rotisserie of claim 25 wherein an axis of the spit is closer to the transparent window than to the cooking heat source.

27. (Original) The food cooking rotisserie of claim 24 wherein the enclosure has an access door.

28. (Original) The food cooking rotisserie of claim 27 wherein an axis of the spit is closer to the access door than to the cooking heat source.

29. (Original) The food cooking rotisserie of claim 24 wherein, when the control box is coupled to the enclosure, there is an air gap between an outside face of the enclosure and an inside face of the control box.

30. (Original) The food cooking rotisserie of claim 24 wherein the side walls of the enclosure each has only a single panel between their interior and exterior faces.

31. (Original) The food cooking rotisserie of claim 24 wherein the enclosure has an opening through which food is loaded into the enclosure, and the opening is covered by a door having an interior and exterior face wherein the door has only a single panel between its interior and exterior faces.

32. (Original) The food cooking rotisserie of claim 31 wherein the rotisserie rests on a horizontal surface and the door can drop below the horizontal surface.
